Experience

Frontend Developer | Mentor Assistant

Afaaq Ware | Jul 2026 - Present

- Mentored frontend trainees by **reviewing pull requests**, providing technical guidance, and helping them deliver **production-quality features**.
- Developing a production-grade Next.js application as part of a collaborative engineering team, contributing new features and maintaining existing functionality.
- Participating in **Scrum ceremonies**, collaborating with teammates to plan, estimate, and deliver sprint objectives.

Frontend Developer | Website Team Member

IEEE | Feb 2026 – Aug 2026

- Selected through a **competitive evaluation** to join a cross-functional team, collaborating daily with designers and developers to deliver the branch's official website on schedule.
- Took ownership of **key features end-to-end**, from understanding requirements to delivering solutions that let the organization manage events, members, and content independently without technical support.
- Drove **front-end architecture decisions**, maintained high standards of **quality and consistency** across the entire site, ensuring a polished, professional experience that reflects well on the brand.

Frontend Developer | Internship

Huma Volve | Oct 2025 - Nov 2025

- Contributed to a 5-member frontend team to deliver **2 full-stack projects** within a 4-week timeline.
- Collaborated with backend and UI/UX teams to align requirements and ensure smooth workflow.
- Delivered **4 frontend-focused presentations** attended by 90+ developers.

Projects

IEEE El-Shorouk Official Website (Full-stack)

[Live site](#) | [View Code](#)

- Led the development of a **role-based admin dashboard** enabling event, member, committee, and form management for the entire student branch.
- Built a **dynamic forms platform** supporting custom fields, file uploads, Excel export, drag-and-drop field ordering, and public submissions with automated validation.
- Architected a **reusable frontend design system** and component library adopted across the application, improving consistency and maintainability.
- Authored **technical documentation and onboarding guides** that enabled future developers to maintain and extend the project efficiently.

AI-Assisted Chest Screening Platform (Full-stack)

[Live site](#) | [View Code](#)

- Developed the **complete user interface and experience** including a landing page, registration and profile management, and hospital directory, ensuring a seamless and intuitive journey from first visit to diagnosis.
- Created an **end-to-end medical image analysis workflow** that lets users upload chest scans, receive AI-generated results with visual indicators, and download medical reports.
- Contributed to building a fully bilingual platform (English/Arabic) from the ground up, making the service accessible to millions of Arabic-speaking users across the region.

Technical Skills

React.js, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, Redux, React Query, HTML, CSS, SCSS, Git, GitHub, REST APIs, Postman, Figma, PHP

Education

Bachelor of Computer Science & Information Systems

Culture and Science University

Relevant Coursework: Web Technologies (93%), Software Engineering (82%), Algorithms (91%), Data Structures (81%).

GPA: 3.1 / 4.0
